Projet(s) / Motivations:

- Why now: Integrate the APEEE early into my children's curriculum, learn from others to be able to continue the projects started by those whose children will leave the school
- Project 1: Help the students master the basics but also adapt to the changing world (digital, climate, environment/'*planet, people, prosperity, peace, partnerships*')
- Project 2: Create a sense of community that will stay with children for a lifetime and build on the unique chance of European schools' systems diversity in a European School
